

# Arshmeen Kaur

+1-(343) 987-5974 | [arshmeenk19@gmail.com](mailto:arshmeenk19@gmail.com) | [Linkedin](#) | [Portfolio](#) | [Github](#)

## PROFILE

---

Software developer driven by results with experience in solving complex engineering problems through scalable backend systems and AI-powered solutions. Improved system performance and data accuracy by up to 30% using NLP and automation. Skilled in Python, REST APIs, and AWS, with a strong foundation in data structures and algorithms. Experienced in Agile environments, with a track record of delivering high-impact end-to-end solutions, user-focused.

## EDUCATION

---

### Lambton College

*Post Graduation in Full Stack Software Development, 3.61/4*

Ottawa, ON

*Sept. 2024 – Present*

### Thapar Institute of Engineering and Technology

*Bachelors of Engineering in Electronics and Communication, 7.33/10*

India

*Aug.2019 – July 2023*

## EXPERIENCE

---

### WIL Project

*Lambton College*

January 2026 – April 2026

*Ottawa, Ontario*

- Built a full-stack Pet Adoption Platform to simulate real-world product delivery in an Agile environment, ensuring timely completion of weekly sprint milestones.
- Collaborated with cross-functional team members to resolve frontend-backend integration challenges and ensure seamless API communication during sprint cycles.
- Managed development tasks using Git and SDLC practices to maintain code quality, incorporate feedback from IIP sessions, and improve overall system design.

### Cipher Square Technologies

*Software Developer*

Oct 2023 – July 2024

*Delhi, India*

- Developed RESTful APIs using Flask to address integration gaps between NLP modules and frontend systems, improving communication efficiency and enabling scalable deployment.
- Enhanced NLP models to address low text analysis accuracy, improving performance by 20% and streamlining user feedback collection.
- Implemented AI models to improve data extraction processes, increasing accuracy by 30% and optimizing information retrieval across applications.

### Eaton Corporation

*Data Science Intern*

Mar. 2023 – Sep. 2023

*Pune, India*

- Developed a Python-based search tool using NLP techniques to address inefficient manual data retrieval from PDF and Excel files, improving search speed and usability.
- Engineered an automatic report generation tool using Python to streamline reporting workflows, integrating PyQt5 and Tkinter for improved usability.
- Automated Excel and Word workflows using openpyxl, docx, regex, and VBA macros, improving report generation efficiency by 40% and supporting audit readiness.

## PROJECTS

---

### Spiro | *Python, Algorithm Optimization, Constraint Satisfaction, CLI Tools, Unit Testing*

- Developed a high-performance Sudoku solver using backtracking to address computational inefficiencies in traditional solving approaches.
- Optimized algorithm with smart candidate selection and preprocessing to minimize backtracking steps, reducing average solve time to under 2 seconds.
- Validated performance by testing across 1,000+ puzzles of varying difficulty levels, achieving 100% accuracy and consistent speed benchmarks.

## **Toasty Haven** | *HTML, CSS, JavaScript, Responsive Design, Performance Optimization*

- Developed a responsive website to enhance product visibility and user experience, ensuring cross-browser compatibility.
- Implemented interactive UI features and optimized front-end code, enhancing usability and engagement across desktop and mobile platforms.
- Improved performance by optimizing assets and code structure, achieving a 90+ Lighthouse score and ensuring a seamless user experience.

## TECHNICAL SKILLS

---

**Languages:** Python, C/C++, JavaScript, HTML, CSS, SQL, Bash, Shell Scripting

**Technologies:** REST APIs, CI/CD pipeline, Docker, DevOps

**Developer Tools:** GitHub, Bitbucket, Jira, Confluence, Docker, GitHub Actions, Slack, VS Code, PyCharm

**Libraries:** Pandas, NumPy, Matplotlib, PyQt5, Tkinter

**Agile:** Scrum, Sprint Planning, SDLC

**Cloud Platform:** AWS

**Operating Systems:** Linux, Ubuntu
